

THE CUSTOMISED INTERFACE SOLUTION
FOR **HOTELS, CLUBS & RESORTS.**

FutureLink 

FutureLink enables you to seamlessly interface critical systems with your FuturePOS and Quest registers, and with Future the 'Back Office' inventory management software. Whether you want to link one system, or multiple systems, we can easily customise a version of FutureLink to suit your particular situation.

- » Link gaming machine points programs, providing instant recognition of members name and points balance. Allows members to purchase products by 'redeeming' points.
- » Link front office/room reservation systems allowing guests to charge to their room account from any register in the venue (e.g. Hotel Concepts, ease, HiRUM, Millennium, Starfleet, CMS, RMS and others).
- » Link security cameras to detect fraud. Electronic journals from registers can be overprinted on camera images so that you can check staff accuracy and deter potential theft situations. Also search for images of specific types of sales (e.g. no sales or refunds).
- » Link loyalty programs
- » Link membership programs
- » Link the dining customer loyalty program Respac
